PCSAE: Palo Alto Networks Certified Security Automation Engineer

The PCSAE certification validates the knowledge and skills required to develop, analyze and administer our Cortex XSOAR security orchestration, automation and response platform with native threat intelligence management.

Certification Objectives

Cortex XSOAR is a single platform that orchestrates actions across your entire security product stack for faster and more scalable incident response. The PCSAE validates that engineers can correctly understand the utility of out-of-the-box and custom playbooks and integrations. They are also able to identify customer processes that can be automated through XSOAR, and know how to customize XSOAR to reduce the Mean Time to Resolution leveraging the rest of their security products.

Target Audience

Anyone who wants to demonstrate knowledge, skills and abilities using Palo Alto Networks Cortex XSOAR functionality, including customers, partners, system engineers, analysts, and administrators.

Enablement Path

This certification has no prerequisites. Recommended training include: *Fundamentals of Security Operations Center (SOC), Introduction to Cortex XSOAR, Cortex XSOAR Admin Training, Cortex XSOAR Analyst Training, and Cortex XSOAR SOAR Engineer Training.* In addition individuals should have the equivalent of three years experience with incidents response processes and security incident management.

Palo Alto Networks Education

The technical curriculum developed and authorized by Palo Alto Networks and delivered by Palo Alto Networks Authorized Training Partners helps provide the knowledge and expertise that prepare you to protect our digital way of life. Our trusted certifications validate your knowledge of the Palo Alto Networks product portfolio and your ability to help prevent successful cyberattacks and safely enable applications.
